

Criteria for granting funding by Proex to professors and students

Provided that the rules for granting financial support by Proex are observed, approval by the CCP (Program Coordinating Committee) of requests will be contingent on the following criteria:

1. Relevance of event;
2. Cost of request;
3. Academic performance of the interested party (in the case of students);
4. Engagement in the Graduate Studies (in the case of professors)
5. Previous grants already given;
6. Whether the request might be otherwise fulfilled by distinct available resources

In requests that involve the presentation or submission of papers, the granting of funding shall be subject to the publication of the paper in EAE's Working Papers series.

In requests that involve the payment of an enrollment fee, the granting shall consider the value which is smaller.
